KRUPPS DISHWASHER MACHINES

SINCE 1965

100% MADE IN ITALY

SOFT RANGE S209E

TYPE	Glasswasher
LINE	SOFT RANGE
BASKET	400x400
SIZE	470x595x710h

Designed to ensure maximum efficiency even with hard water, **S209E** is the glasswasher from the **SOFT** line equipped with an **integrated automatic softener** , which autonomously manages resin regeneration cycles based on incoming water hardness. Regeneration occurs during operation without stopping the machine; salt refilling is the only required task, notified directly on the display. The **UNIKO panel** in tempered glass allows immediate and intuitive interaction: from selecting among a **wide variety of programs** to monitoring cycle progress and real-time machine status via the **SMART START** button. With a usable height of **310 mm** , S209E washes **cups, glasses, saucers, and plates** . The **electronic board** allows high customization of parameters, while the **Thermostop** function ensures wash and rinse start only once the set temperature is reached. The **dual detergent and rinse aid dispenser** included as standard ensures perfect dosing every time. The automatic end-of-day self-cleaning cycle protects boiler and tank from limescale. The wash arms ensure effective removal even of stubborn dirt. The structure is made of **AISI 304 stainless steel** , with front-accessible components for fast maintenance.

MODEL COMPLIANT WITH EN IEC 63136 :
See the **performance chart**
