

KORAL NORTH AMERICA K1100E-A

TYPE	Pass-through dishwasher
LINE	KORAL NORTH AMERICA
BASKET	500x500
SIZE	620x770x1435/1900 - 30.315x56.4961/56.4961

The **KORAL** line is distinguished by the electronic PCB, the control system provides great customization options based on your needs, allowing you to accurately adjust any parameter and ensure optimum washing results.

The innovative **UNIKO tempered glass touch screen display** makes any operation simple and intuitive, from the choice of most suitable wash cycle to its progress control, as well as constantly monitor the dishwasher state with ease. The large variety of wash cycles makes the dishwasher customizable according to your needs.

The K1100E-A hood-type dishwasher is the most suitable solution for establishments that have to wash different types of dishes, proving capable of washing glasses, dishes, medium-sized objects and GN 1/1 gastronorm trays in just a 620 mm width, ensuring a maximum productivity of 60 racks/hour (1080 dishes/hour). The hood-type models are fitted with an easily removable rack support for easy cleaning and a rounded moulded tank with integral filters for perfect draining and absolute hygiene. The "PUSH TO START" cycle start system ensures less waste preventing the start of empty washes.

This model is ETL and ETL Sanitation certified as it meets the requirements of the NSF/ANSI 3 rule. The washing cycles have been specifically designed to make the dishwasher compliant with the NSF hygienic safety standards, recognized by the American National Standards Institute (ANSI).

The electronic control allows you to manage various parameters to give you an absolute customization level and the continuous self-diagnosis allows you to minimize machine downtime, suggesting some operations that need to be verified. The self-cleaning cycle at the end of the day cleans the wash tank and empties the hot water from the boiler / booster, preventing limestone from building up inside. The standard double peristaltic electric rinse-aid and detergent dispenser ensures the best result from each wash cycle with great savings thanks to the precise dosage managed by the electronic PCB; whereas, the stainless steel washing and rinsing arms ensure great reliability and durability. The Thermo-stop function checks that washing and rinsing begin only when the desired temperature is reached. The bodywork is made entirely of AISI 304 steel and has been designed with all of the components in the front for easy technical assistance. Sturdy and reliable dishwashers to best deal with every moment of your day.
